- Includes 3/16" dacron bridle assembly
- Weighs only 18 lbs. (8 kg)
- Complete with attractive rugged storage case

The "Rock 'n Roll"™ Boat Stabilizer**R10-702 36"** (91.5 cm) [Buy Now](#)

Now, your whole family can enjoy boating more comfortably while anchored, drifting, fishing or moored! Our patented hydrodynamic design breakthrough relies on shape rather than heavy weight, making it more efficient and easier to handle. Our proven hinged-wing stabilizer operates silently without noisy flapper valves or vanes to keep you awake at night. So remarkably effective, it actually reduces motion sickness and accidents caused by uncomfortable wind and sea conditions. For use on sailboats, the Rock & Roll may be attached to a "swing out" boom or to a spinnaker pole. ([See thumbnail](#)). For use on other boats, we recommend the ["Rock 'n Roll" Outrigger](#). **Storage/carrying case included with stabilizer.**

• [United States Patent No. 5,095,839](#)

NOTE: "Rock'n'Roll" Boat Stabilizers "DO NOT INCLUDE" depth control or retrieval lines.

For boats up to 40,000 lbs. displacement one Rock 'n Roll Boat Stabilizer is recommended. For boats over 40,000 lbs. or in situations where more stabilization is required we recommend two stabilizers.
