

Our watermakers can be used on boats or land-based projects of any size and virtually any water usage capacity. Filling up your fresh water reserves at a marina can be very expensive, as can buying bottled drinking water, with premium water costing nearly \$5 per gallon. Save money and have an unlimited supply of pure drinking water with an SK Watermaker.

### Land Based Watermakers

- No project too big or small
- Eliminates water transportation costs
- Creates an unlimited and cost-effective source of onsite freshwater

**Manufacturer  
of Desalination  
Systems (Watermakers)  
Leading the Industry in Marine,  
Land and Commercial  
Applications.**

# COMMERCIAL & LAND BASED SYSTEMS

- Custom designed to your specifications
- PLC controls - semi-automatic or fully automatic
- Full manual provided
- 316L stainless steel valves
- High TDS divert
- Product water flow meter
- Reject water flow meter
- Low pressure cut-off
- High pressure relief valve
- Cleaning/pickling system
- TEFC electric motor
- 316L stainless steel fittings
- Pre-filter feed pump
- 5 micron and 20 micron pre-filters
- Custom frame design self-contained or modular
- 200-1600 gallons per hour

GPD MEMBRANES PUMP MOTOR FLA AMPS					
			GPM	HP	110/220
200	(1)	2.5" x 21"	2.3	1.5	15.6/7.8
400	(2)	2.5" x 21"	2.3	1.5	15.6/7.8
500	(1)	2.5" x 40"	2.3	1.5	15.6/7.8
600	(3)	2.5" x 21"	2.3	1.5	15.6/7.8
1000	(2)	2.5" x 40"	3.0	2	22/11
1500	(3)	2.5" x 40"	3.6	2	22/11
2000	(2)	4" x 40"	4.2	2	22/11

## SC STANDARD SERIES

- Self-contained
- Space saving design
- Easy to use
- 316L stainless steel valves
- High TDS divert
- Sample port
- Product water flow meter
- Reject water flow meter
- Low pressure cut-off
- High pressure relief valve
- Cleaning/pickling ports
- TEFC electric motor
- 316L stainless steel fittings
- Pre-filter feed pump
- 5 micron and 20 micron pre-filters
- Sturdy powder coated aluminum frame
- Anti-vibration mounts
- Auto flush
- 21-83 gallons per hour

## DB SERIES

- Manual operation
- Modular design
- Easy to use
- 316L stainless steel valves
- Manual TDS divert
- Sample port
- Product water flow meter
- High pressure relief valve
- TEFC electric motor
- 316L stainless steel fittings
- Pre-filter feed pump
- 5 micron and 20 micron pre-filters
- Powder coated aluminum frame components
- Anti-vibration mounts
- Manual flush
- 6-83 gallons per hour

## SC COMPACT SERIES

- Self-contained
- Space saving design
- Easy to use
- 316L stainless steel valves
- High TDS divert
- Sample port
- Product water flow meter
- Reject water flow meter
- Low pressure cut-off
- High pressure relief valve
- Cleaning/pickling ports
- TEFC electric motor
- 316L stainless steel fittings
- Pre-filter feed pump
- 5 micron and 20 micron pre-filters
- Sturdy powder coated aluminum frame
- Anti-vibration mounts
- Auto flush
- 8-25 gallons per hour

## HC SERIES

- Automatic operation
- Modular design
- Easy to use
- 316L stainless steel valves
- High TDS divert
- Sample port
- Product water flow meter
- Low pressure cut-off
- High pressure relief valve
- TEFC electric motor
- 316L stainless steel fittings
- Pre-filter feed pump
- 5 micron and 20 micron pre-filters
- Powder coated aluminum frame components
- Anti-vibration mounts
- Auto flush
- 8-83 gallons per hour
