

Teak Care

-Barka TEAK WONDER-From the Boss

Teak Wonder, originally developed in the USA, was acquired by BARKA in 2014. Chemical formula of some products were modified to comply with strict EU regulations for biodegradability.

Our boss says:

“Cleaning discoloured teak is simple. Decant cleaner into a 1 litre spray bottle. Wear a simple face mask to avoid the spray. Dampen the surface to be cleaned with water, spray that area with TW Cleaner and use a soft bristle brush to work the cleaner gently into the grain. For large areas, use a soft to medium bristle broom. Keep area slightly damp for about 4-5 minutes then hose or wash off. When finished and dry inspect for any “misses” and re-apply.

Teak Wonder Brightener does exactly that. Just dampen the surface, spray on the brightener and you will be amazed how the teak looks almost new!!.

Leave to dry and apply Teak Wonder Dressing Sealer with a foam type paint brush to further improve the ‘look” and help preserve the appearance for several months.” Make sure any spills are wiped clean with meths.
