

# 4000 Series

So-Pac hatches are UV resistant so won't discolour like those made from inferior plastics.

3 sizes in white, grey, dark grey and black

Easy to install and maintain. Create a storage locker anywhere!

# SOPAC PLASTIC ACCESS HATCHES

**UV RESISTANT ASA PLASTIC**  
**LOW PROFILE FLUSH FITTING REINFORCED LID**  
**NON-SKID SURFACE**  
**SUPPORTS NORMAL CREW TRAFFIC**  
**EASY TO INSTALL**

**USE FOR:**  
**STORAGE LOCKERS**  
**INSPECTION HATCHES**  
**ANCHOR LOCKERS**

Our hatches are moulded from ASA plastic, a stronger, more durable and higher UV resistant grade that will not become brittle with age. Hatch lids open 180° and when closed they completely conceal the countersunk fastenings. Lid shape deflects water away from the “knife edge” seal that ensures hatches are weathertight when installed on rigid flat horizontal and vertical surfaces. Contoured handles twist open and close heavy duty “dogs” to create a positive latch. With a low profile of just 13mm above deck they look good in the surroundings of high-quality boats of all sizes whether constructed in aluminium, composite, or timber. Intrusion below deck is 18mm.

Available in a choice of white, grey, dark grey and black. Key security lock available on large hatches. Proudly designed and manufactured in New Zealand. CE approved to ISO 12216:2023
