About our Jet Thrusters

JT-30 | JT-50 | JT-70 | JT-90

Jet Thruster Bow and Stern Water jet systems are the alternative to the conventional bow thruster. This Dutch quality product can be easily built into motorboats, sailing yachts and sloops. The powerful water pump and water distribution valves direct the water jet to extremely small skin penetrations. Because there are no moving parts below the waterline, the Jet Thruster is reliable and safe to use.

The Jet Thruster Combi system offers a bow and stern thruster making the boat extremely maneuverable and easy to control. For boats with very limited bow or stern draft, this system is ideally suited.

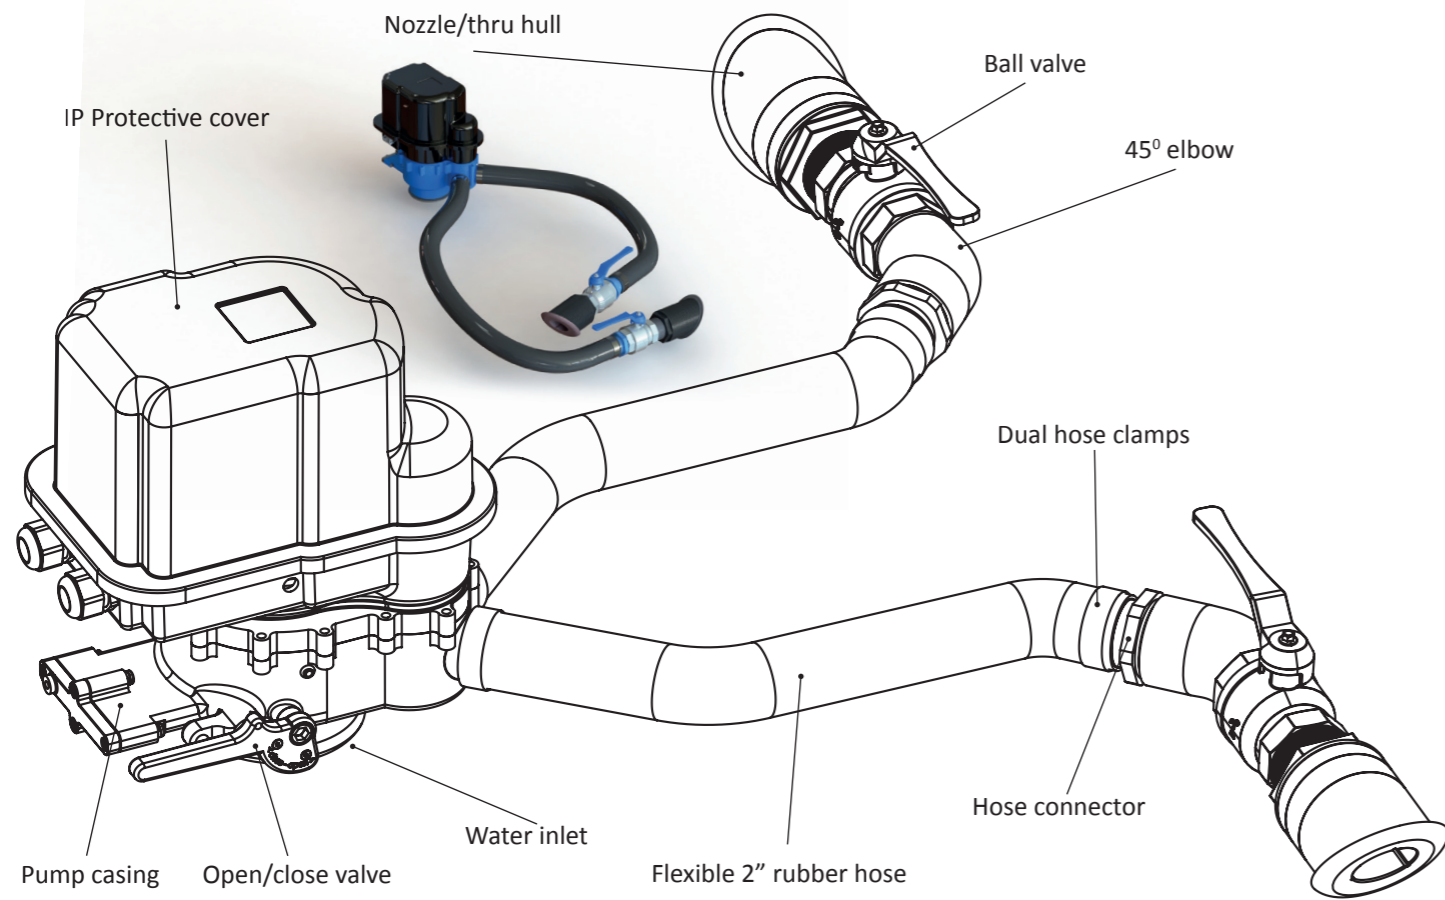

The Jet Thruster can be built into vessels of 25 to 60 feet. Because no fiberglass or polyester needs to be processed, installation is quick and easy.

IP protected! - ISO 8846 - Safe for gasoline engine areas

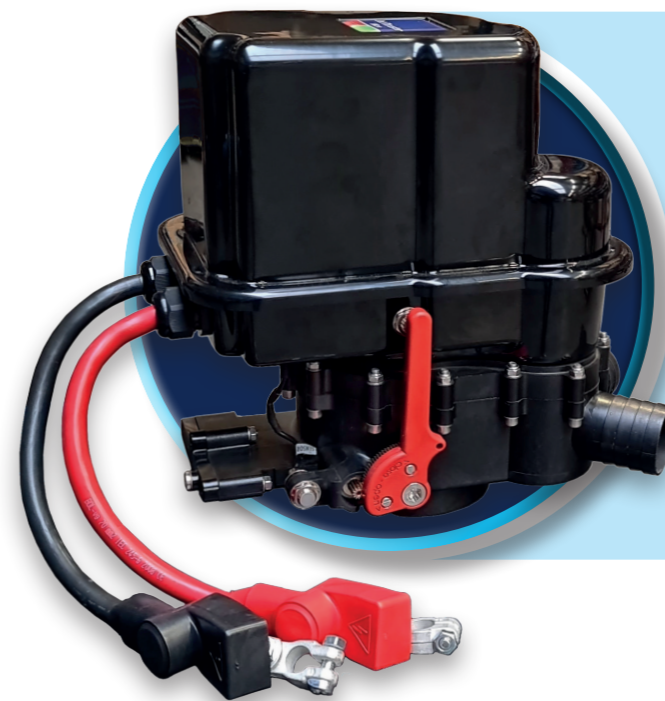

CE Certified

All our products are manufactured according to CE regulations. We keep the rights to change descriptions, graphs or statements, which are required for technical development of our Jet Thruster systems.

HOLLAND MARINE PARTS
WE KEEP YOU MOVING!

- 
Boats up to 30ft
- 
Sailing Boats up to 30ft
- 
Perfect for Motor Boats
- 
Plug & Play!
-
