

Magma – Catalina II Infrared Barbeque

Perfect your grilling skills with Magma's Catalina II Infrared Gas BBQ

Designed with boaties in mind - 304 stainless steel

The perfect addition for feeding your crew, this versatile, portable, finely crafted BBQ is always ready for action.

Includes: an elegant exterior design, a completely redesigned combustion system that keeps the grill lit even in heavy winds, a hermetically sealed thermometer, a dependable electronic ignition system, powered by a single "AAA" battery, and an ultra high-temp glass viewing window.

Anti-Flare Infrared technology produces intense, evenly distributed heat, eliminating Flare-Up and immediately emulsifies drippings giving your meal a great smoky flavor. The primary grilling surface give you the option of searing, slow cooking, or warming.

Constructed entirely of 304 mirror-polished stainless steel to withstand even the harshest environments.

Equipped with fold-away table top legs for go-anywhere use.

The included swiveling control valve/regulator, (NZ compliant) connects to existing on-board low pressure propane (LPG)

Magma offers the largest selection of mounting options (sold separately) to customize the BBQ for your needs.

Contact us for heavy duty mounting options.

NOTE: This BBQ includes a NZ approved LPG valve - ready to go!

We can also supply low output valves for use with gas cannisters (see our valve guide)
