

Magma – Marine Kettle 3 Barbeque

Enhance your grilling experience with Magma's Marine Kettle 3 Combination Stove and Gas Grill.

This versatile, portable grill includes features that are both useful and user friendly including an electronic ignition system, powered by a single "AAA" battery, a heavy-duty inner safety shell that keeps the outside of the grill cooler, guards against discoloration, while adding years of life to the grill.

Made of mirror polished, 304 marine-grade stainless exterior finish provides superior corrosion resistance, in even the harshest environments.

Dependable, even in a stiff breeze, due to a virtual blow-out proof turbo venturi tube design, patented heat distribution system and burner, which directs more heat to the cooking surface.

Additional features include a balanced hinged lid that won't slam shut as the boat rolls, polished, 18-9 Stainless Steel "Stay Cool" handle with air cooled supports, and Stainless Steel L-bracket and clamp assembly to provide easier, more positive level mounting. These new features combined with Magma's patented radiant plate and dome system, make this the only boat grill that is truly a grill, stove, or oven -- a great advantage to boats without a galley, or if the crew just wants to cook outdoors.

The included swivelling control valve/regulator, (NZ compliant) connects to existing on-board low pressure propane (LPG)

Magma offers the largest selection of mounting options (sold separately) to customize the BBQ for your needs.

Contact us for heavy duty mounting options.

NOTE: This BBQ includes a NZ approved LPG valve - ready to go!
We can also supply low output valves for use with gas cannisters (see our valve guide)

Serves 4-8 People

Dimensions:

Length (43.5 cm)

Width (43.5 cm)

Height (37.1 cm) including valve

Weight (5.45 kg)
