LOW PROFILE FLUSH FITTING REINFORCED LID
NON-SKID SURFACE
SUPPORTS NORMAL CREW TRAFFIC
EASY TO INSTALL & MAINTAIN

USE FOR:
STORAGE LOCKERS
INSPECTION HATCHES
ANCHOR LOCKERS

Our 4000 Series hatches are moulded from ASA plastic, a stronger, more durable and higher UV resistant grade that will not become brittle or yellow with age.

Hatch lids open 180° and when closed they completely conceal the countersunk fastenings.

Lid shape deflects water away from the “knife edge” seal that ensures hatches are weathertight when installed on rigid flat horizontal and vertical surfaces.

Contoured handles twist open and close heavy duty “dogs” to create a positive latch.

With a low profile of just 13mm above deck they look good in the surroundings of high-quality boats of all sizes whether constructed in aluminium, composite, or timber. Intrusion below deck is 18mm.

Available in a choice of white, grey, dark grey and black.

Proudly designed and manufactured in New Zealand. CE approved to ISO 12216:2023
